## Never be without power again

Most of us need constant access to our mobile phones and tablets so running out of power can be a real pain. What we need is a simple way of charging our devices on the move without having the hassle of carrying all those chargers and cables.

The new UniPal Extra is a stylish universal charger with a **built-in Power Bank**. Compact, lightweight and easy on the eye, this portable charger is a one-stop charging solution for over 300 different lithium ion\* and AA Ni-MH rechargeable batteries. It will also charge your USB devices.

The unit is supplied with a USB to micro-USB cable and can be charged from the mains, from a USB port on your laptop/PC or by using an in-car USB charger. It can also be used as a stand-alone charger using the built-in Power bank.

So, when you're next out and about, take the UniPal Extra along with you and top up your devices on the go!

\*\*Charges practically all 3.6V, 3.7V, 7.2V & 7.4V li-ion batteries.
